

**Deer Fence
Canada Inc**

Quick Start Guide

1. Put on the required Personal Protective Equipment
2. Place Post Pounder vertically on stand or hold vertically.
3. Check oil level.
4. Check fuel level.
5. Press the priming bulb until fuel is seen in return line.
6. Close the choke.
7. Slide the thumb switch on the throttle handle to “ON”
8. Grasp the Honda GX35 engine pull starter grip and pull.
9. Let the engine warm up.

Do not press the throttle until the Post Pounder is on a post.

9. Lift Post Pounder onto the post.
10. Hold both handles and pull firmly down exerting 5-10kg
11. Press Throttle gradually until the hammering action is felt.
12. Drive post in to desired level.
13. Release Throttle.
14. Remove Post Pounder from post and move to next post.

Do not press the throttle when moving the Post Pounder from post to post.
